

I am

customer

I'm trying to

develop a smart
farming application
using IOT

But

I think, I face to
some difficulties

Because

By collecting data on a
large scale, you can use to
it create meaningful
analyses of livestock, crop
or weather conditions.

Which makes me feel

Not
satisfied

I am

customer
(Student)

I'm trying to

develop a smart
farming application
using IOT

But

I think, I face to
some difficulties

Because

Overuse of pesticides and
fertilizer in agricultural fields
leads to destruction of the crop
as well as reduces the efficiency
of the field increasing the soil
vulnerability toward pest.

Which makes me feel

Frustrated
